Rich10: i'm not an expert on .deb files, but what does: file /path/to/file/file.deb return? /path/to/file/file.deb: ELF 32-bit LSB executable, Intel 80386, version 1 (SYSV), dynamically linked, interpreter /lib/ld-linux.so.2, for GNU/Linux 2.6.24, BuildID[sha1]=80cc854cc79e1a6bb862d5ae54e7c91f769db7b5, stripped

Rich10: Please don't flood; use to paste; don't use Enter as punctuation.

arhax, I would suggest you to do the following steps: find out what is the problem, do you have a backup of your home directory? and finally try reinstalling and seeing if it works

Rich10: strange, that might be why its not extracting

vitimiti : i don't have a backup of the home directory hm, wine is not in the debian or ubuntu repos. but they have a 3rd party repo

!wine | k11\_ k11\_: WINE is a compatibility layer for running Windows programs on GNU/Linux - More information: - Search the!AppDB for application compatibility ratings - Join #winehq for application help - See!virtualizers for running Windows (or another OS) inside Ubuntu this is my first time using linux

hitsujiTMO: that fact is clear :) so how do i reinstall everything

arhax: make a new user and see if its the same how and how to go back i don't know if i have ssh or samba

arhax: run the live cd. and if you need to put the home on a different partition/drive just do 82157476af
